# SILICONIZED BAKING PAPER FOR BAKERIES

**AMBER PAPER** offers high quality, two side silicone treated parchment paper produced from virgin fibers without chemical additives. All raw materials used in the manufacturing process comply with the necessary food and hygienic regulations. Our products are available in standard or premium quality and come in white or natural color. Baking paper is environmentally friendly and can be recycled or composted after usage.

## BAKING PAPER IN SHEETS AVAILABLE FROM STOCK

Sheet size, mm	Sheets per box	Pallet size, box
300 x 400	500	320
400 x 600	500	160
570 x 780	500	80
570 x 980	500	70
500 x 700	500	80
600 x 800	500	80

We are able to produce almost every other custom size.  
Minimum quantity per specific order – 1 pallet.

Benefits of using baking paper:

- **excellent release and grease-resistant properties** even for specifically demanding applications such as pretzels and lye solution treated goods;
- **frost and heat resistant** (from  $-35^{\circ}\text{C}$  /  $32^{\circ}\text{F}$  / up to  $220^{\circ}\text{C}$  /  $428^{\circ}\text{F}$ ).
- **two side siliconized paper which has non-stick properties** and can be used several times, which makes it a cost effective solution;
- **no oil is needed** to be applied on the surface of trays, tins and even frying pans;
- **reduces the cleaning cycles**, increases productivity, eases work and saves time, extends the lifetime of your kitchen equipment

The 2-side silicone impregnated baking paper in natural color is widely used for baking, cooking and serving of different food products. It is suitable for many food preparation applications. Due to the siliconized surface, your products are protected from sticking to the baking trays. Most foodstuffs can be either served on baking paper or safely stored and refrigerated together with it.

Our 2-side white baking paper is excellent for professional use. It can be used multiple times and withstand high temperatures. Non-stick properties guarantee high performance of the paper. The white color of the material allows your products to look fresh and appealing.

Baking paper roll in dispenser packaging – a box with perforated tearing knife – is a simple solution for faster catering processes. The paper can be cut in any format that the width allows. This product comes in white color and has all the properties of regular baking paper. The strong box protects the product from damages and also keeps it clean.

## BAKING PAPER IN REELS AVAILABLE FROM STOCK

Roll size	Package size, pcs	Pallet size, pcs
38 cm x 20 m	22	1122
38 cm x 50 m	10	510

57 cm x 200 m	6	108

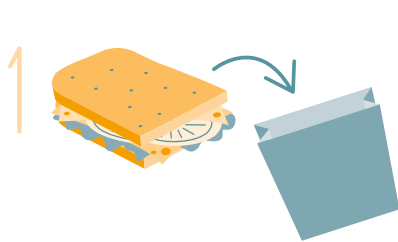

We are able to produce almost every other custom size. Minimum quantity per specific order – 1 pallet.

# NON-STICK, SILICONIZED GRILL BAGS

Preparing grilled foods has become more convenient than ever with AMBER PAPER's high-quality GRILL BAGS. Just put the bag in the oven or directly on the contact grill surface. After heating the food product, the bag can be handed directly to the customer whilst avoiding the usage of additional packaging materials. Your clients can be served faster and more efficiently without the need to scrub the grill between two servings. It also eliminates the risk of cross-contamination. Our GRILL BAGS are ideal for fast food producers, take away restaurants, coffee shops, gas stations, supermarkets, and airlines as well.

## WHY GRILL BAGS?

Hygienic, easy handling and serving due to excellent non-stick, grease and waterproof properties, avoid mess and spills;

No contact with the grill, the food gets its grill marks even through the bag;

Heat resistant paper up to 220°C / 428°F and frost resistant

from -35°C / 32°F;

Safe, biodegradable and compostable;

Possibility to customize the outer side of the bag (a logo or any other information printed on the outer surface with flexographic technology).

# WHO WE ARE

# 20+

YEARS OF EXPERIENCE

At AMBER PAPER, the safety and well-being of our clients' customers is our top priority. We ensure that our products provide reliable and hygienic surfaces for food preparation, guaranteeing the highest standards of safety.

Furthermore, we continuously innovate and create products that anticipate and meet the evolving needs of the food preparation and consumption culture, staying ahead of the curve.

Sustainability is at the core of our operations, extending to our production processes and product usage. We adopt practices that not only conserve valuable resources but also reduce waste and minimize the environmental impact.

Additionally, we actively promote the adoption of more sustainable products and guide our clients in embracing eco-friendly practices. By doing so, we are actively contributing to the transition towards a more sustainable and responsible baking and food preparation industry.

**Our ultimate goal is to foster a healthier, more innovative, and environmentally conscious processed foods community.**
