

Our History

Created on July 1, 1946, the Social Service of Industry (SESI) is an institution that works with companies to improve quality of education and to elevate the level of schooling of Brazilians. It also helps create safe and healthy work environments as well as seeks to increase the quality of life of the worker.

With 1,304 units throughout Brazil, SESI maintains a network of schools that offer primary education, education of youth and adults, continued education, educational support for the sector's workers and their dependents. It also maintains a network of libraries, theaters, and cultural spaces that improve the access of Brazilians to knowledge and the arts.

At its athletic tracks, pools, fields, courts, and soccer fields, SESI's community and activity centers offer workers and the community programs that stimulate the habit of physical exercise, sports, leisure and social integration.

To complement this work, SESI also runs disease prevention programs, promoting the health of members of the national industry and their families.

By working towards quality education, wellbeing of workers, and socially responsible management of business, SESI plays a decisive role in increasing the industry's competitiveness and the country's sustainable development.

International Actions

In order to support the constant updating of institutional capacity and international projection, SESI, SENAI and IEL rely on a solid group of international partners. The challenge is to modernize processes, practices and methodologies in transversal themes such as:

- Educational methodologies and technologies
- Industrial technologies
- Technological innovation
- Workplace health and safety
- Quality of life
- Management
- Lines of Action

Technical cooperation with developing countries aiming at the exchange of knowledge and technologies between SESI, SENAI and IEL and governments, international agencies and other similar institutions

Transfer of key international knowledge and technologies to the Brazilian industry in order to strengthen institutional capacity in education, technology, innovation, management and quality of life.

Outreach to Brazilian industrial companies abroad to supply the demand for consulting services in education, workplace health and safety and quality of life through customized projects.
