

About Us

Who We Are

Enztec is known worldwide as a supplier of innovative orthopaedic instruments for the world's best implant companies. Designing and manufacturing quality hip, knee and spine instruments, with customer support and on-time delivery performance to match.

For over thirty years, we have worked solely on orthopaedic instrumentation. From our team of talented design engineers and manufacturing capabilities, right through to quality and regulatory assurance – we are trusted problem solvers.

Meet Our Leadership Team

Bruce Toughey

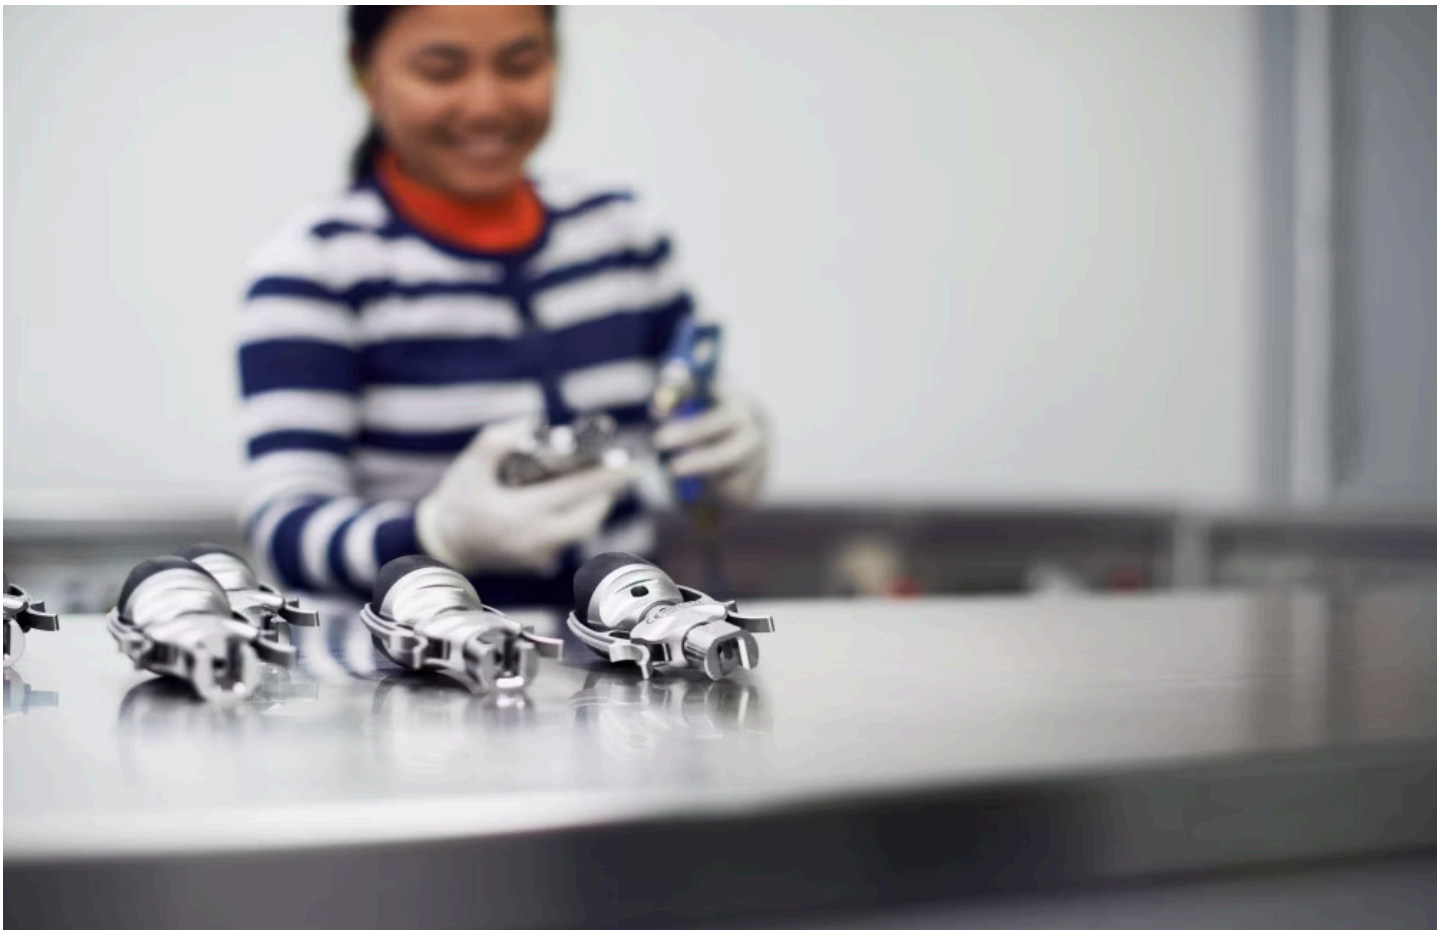

Kate Moorhead

In the beginning

Established in 1992, Enztec was founded with the broad ambition of being a medical device company. In the first few years of business, we worked across a range of medical disciplines including cardiovascular, gynaecology and orthopaedics. For the past 30 years we have worked solely on orthopaedic instrumentation.

Needless to say, we don't just focus on what we do well today. With research actively underway, Enztec remains at the frontier of developing the next generation of orthopaedic instruments, incorporating embedded technologies and data analysis to drive ever-improving patient outcomes.

Why work with Enztec?

Partnership

Partnering with Enztec means you can be confident you'll get support whenever you need it.

Agile

As a focused team we offer customers unrivaled agility, without compromise.

Complex

Experienced at delivering simple and complex products, we can meet any challenge.

Full package

Beyond design and manufacturing, we provide world class regulatory, quality and market knowledge.

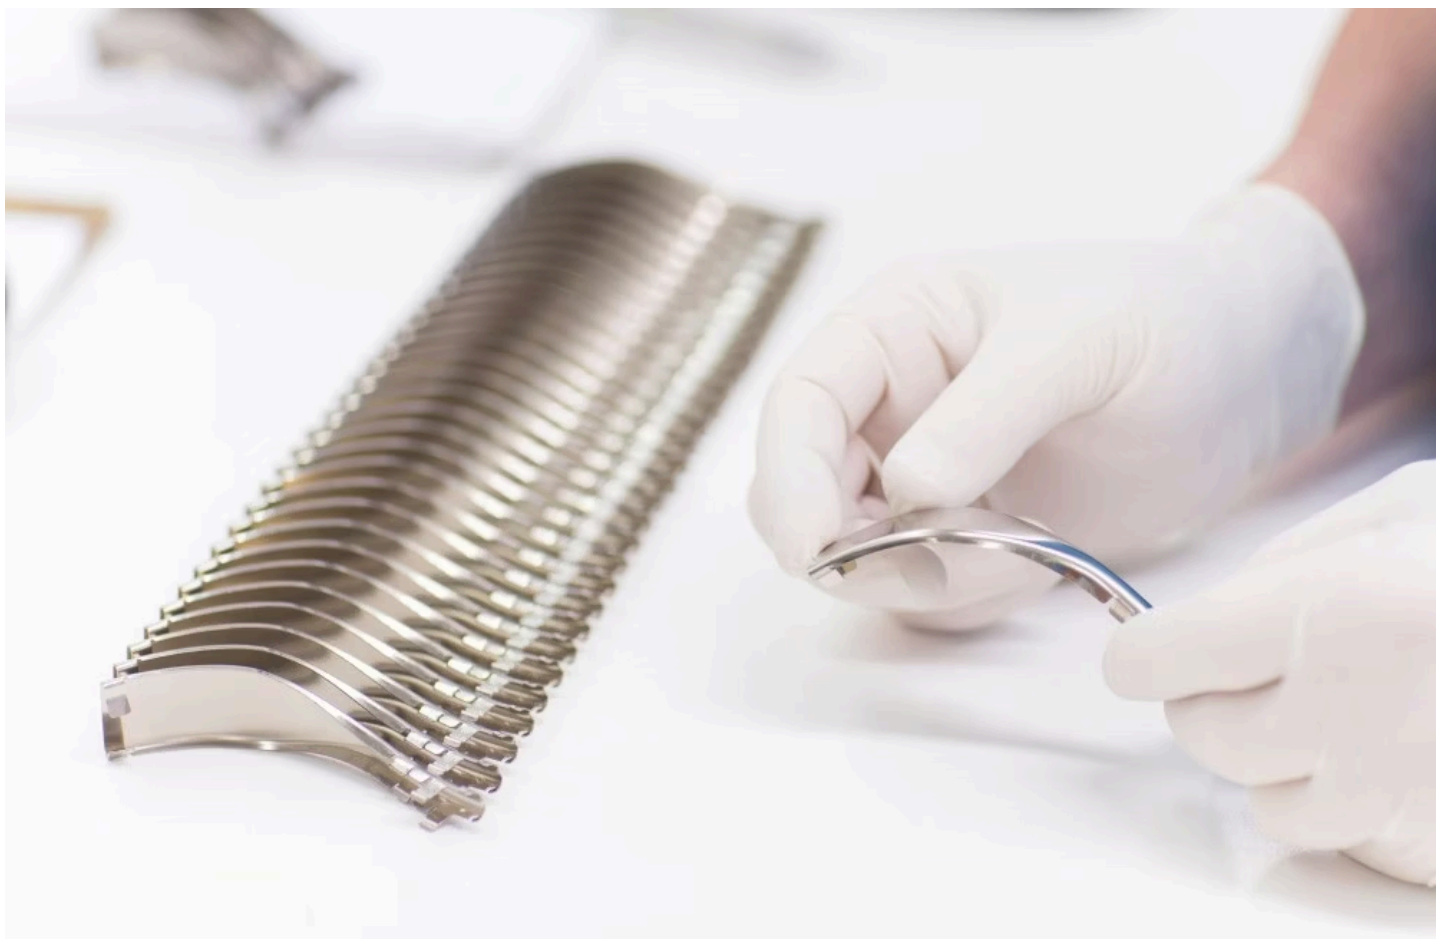

Quality & Regulatory Assurance

We don't just deliver orthopaedic instruments that your surgeons love, we also provide you with full quality and regulatory support, making your adoption and deployment anywhere

around the world smooth and painless. That's why our customers, big and small, keep coming back to us.

Find out how we can help you with compliance activities for all key markets such as CE (MDR), FDA, and TGA, as well as meeting your own team's needs.

Our people differentiate us

Enztec is recognised internationally for delivering outstanding levels of service. Our success is a result of our dedicated people who strive to make a difference every day.

Our niche focus on orthopaedic instruments means our team have the opportunity to hone their skills, enabling us to provide unmatched support and advice to customers so they can reach solutions more effectively,

Our people-centric culture extends beyond our own team and ensures each customer is treated as a long-term partner, fostering deep enduring relationships that withstand the test of time.

Hear what our customers have to say

The talented group of design engineers at Enztec will collaborate effectively with your team to transform your ideas into practical and intuitive solutions that might not have been achieved independently.

Their expertise gives a significant edge to instrumentation design, transforming typically challenging experiences.

Enztec has been, and will continue to be, my go-to design firm for mass market and bespoke me

Pete Cipolletti

Senior Design Engineering Manager & AGT
