Garnek

First Gluten-free in Russia

Features:

- **leaders in gluten-free products in Russia**
- the first «Crossed Grain» in Russia*
- millstone grinding**
- without chemical additives and allergens

*Crossed Grain

- We were **the first in Russia** to receive the right to label our products with a «Crossed Grain» trademark
- This is a safety mark for gluten-free products of the Association of European Coeliac Societies, recognized in most developed countries.

**Millstone Grinding

- This is a unique technology that we borrowed from our ancestors. With this type of milling grain and flour come into contact only with natural materials.
- Grinding on millstones allows you to keep a balanced **natural composition of grain**, thanks to which it is possible to reduce the glycemic index - an important indicator for those who care about their health.
