Company overview

Founded by Italian immigrants in 1896, Laboratorios Ferrini is an Argentine dermocosmetics pioneer manufacturer with a long history of producing high-quality, trusted skincare products for mass consumption. Since June 2022 the company has undergone a strategic modernization program focused on R&D, process automation and international commercialization.

Company Profile

Key facts & milestones

Established: 1896 (family-founded, Italian heritage)

Current ownership & modernization: acquired June 2022. New production lines and technical facilities installed. Currently we are building a new laboratory also in Argentina, a 4000m² facility, to be finished in February 2027.

Core business: formulation, manufacturing, distributions and private label of dermocosmetic and sun-care products for retail and mass channels.

Annual manufacturing capacity: 2.400.000 sunscreens / 2.880.000 lotions / 1.382.400 serums

Export readiness: regulatory dossiers and production scale adapted for export markets

Company Profile

Manufacturing & capabilities

Manufacturing & capabilities GMP-compliant production lines with modern filling, homogenizing and packaging equipment.

In-house formulation lab.

Flexible packaging options: bottles, sprays, lotions, sachets, and textile integration for apparel labeling/branding.

Company Profile

koreia[®]

Formulation proposition:

Specially designed for adolescent skin. Formulations incorporate actives such as hyaluronic acid, Hidraskin, vitamin A and E, marula oil and shea butter to deliver regulated sebum control, targeted hydration, antioxidant protection from pollution, improved softness and skin elasticity. Textures are intentionally lightweight with rapid absorption to suit daily teen routines, and ingredient lists avoid components contraindicated for sensitive young skin.

Consumer benefits:

Feather-light, sheer-finish formulas that reduce shine, refine pores and promote a more even, clearer complexion—effective, age-appropriate care for teens.

Company
Profile

AUREN +

Formulation proposition:

AUREN packs multi-weight hyaluronic systems, stabilized Vitamin C complexes, peptide matrices, niacinamide and gentle retinoid derivatives into feather-light serums engineered for daily rituals. These serums prioritize topical stability, premium sensorial performance and targeted bioavailability, with excipient and preservative choices tuned for skin compatibility and low irritation. Real improvements in hydration, tone and texture in formulas people actually use.

Consumer benefits:

Serums that hydrate at the molecular level, neutralize daily oxidative stress and visibly re-texturize skin smoothing fine lines, refining tone and restoring a firmer, more resilient-looking complexion.

Drops that target pores and problem zones, easy to stack on make up and built to deliver visible results in 28 days or less.

AUREN +

ZONO

Company Profile

Formulation proposition:

Highly hydrating, lightweight lotions and repairing creams, from Sapolán protective multipurpose creams to nutritive “ordeño” and triple-hydra hand creams formulated for rapid absorption, protection and visible regeneration.

Consumer benefits:

Ferrini lotions and creams replenish and strengthen the skin at once. They deliver lasting, deep hydration and concentrated nourishment that smooths roughness, soothes tight, chapped areas and helps reduce the risk of fissures and stretch marks with continued use. Built for daily family care, the fast-absorbing, non-greasy textures restore comfort to very dry or damaged skin while relying on dermatologically minded formulations.
