

THE WOOD STORY

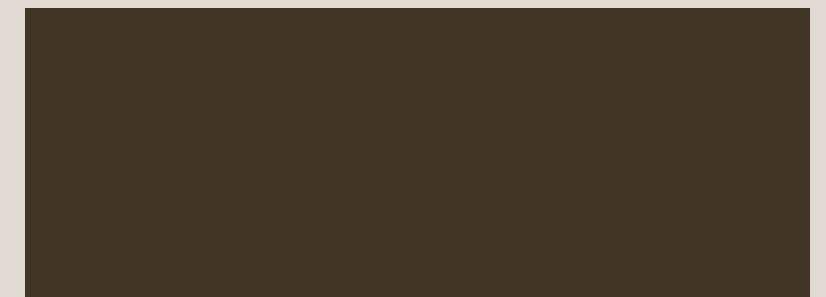

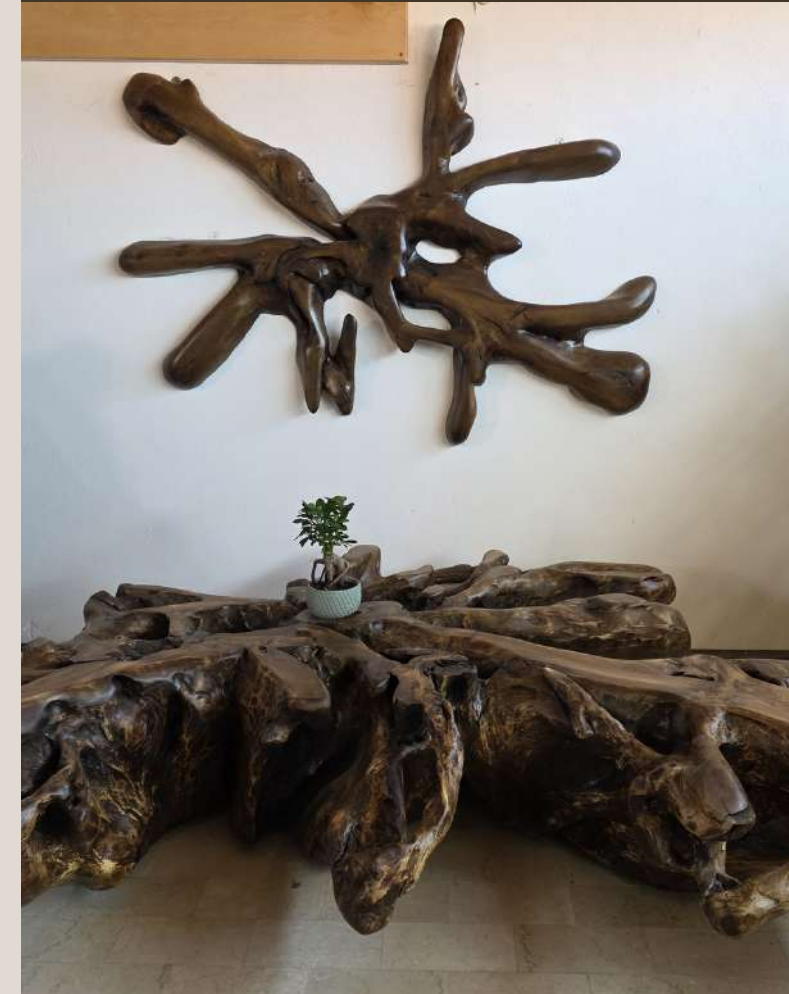

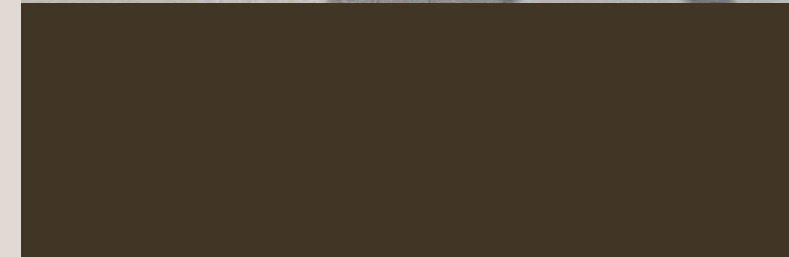

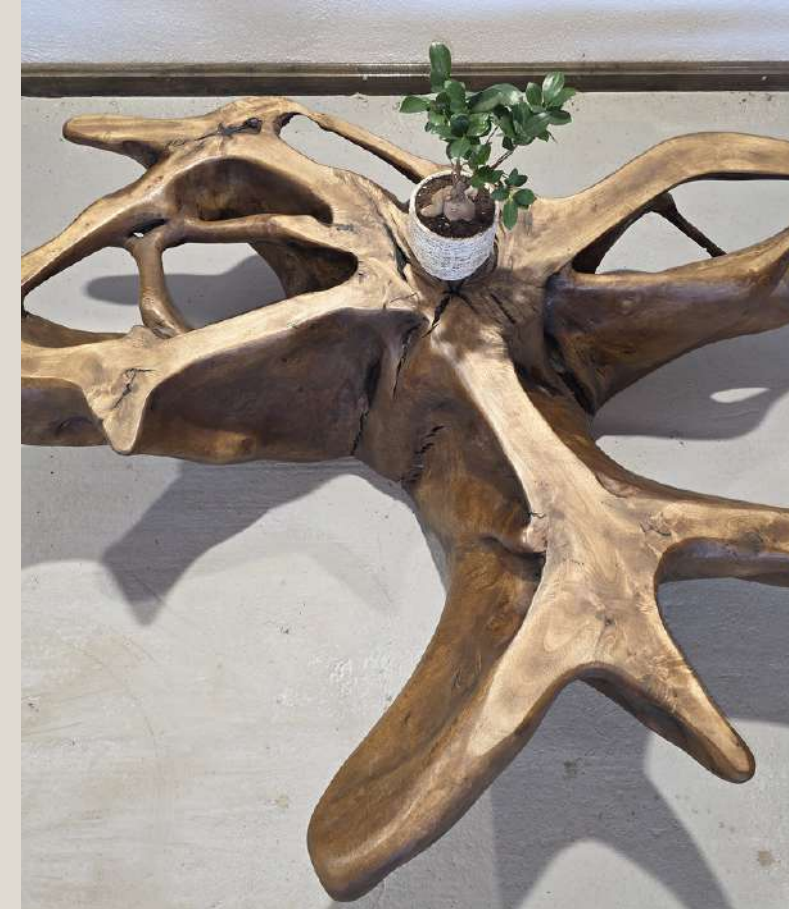

COMPANY PRESENTATION

Welcome to...

our company. We are a **wood-industry start-up** specializing in **unique, handcrafted furniture and decorative pieces** like tables and chairs. Our exclusive collections are created by working solely with tree roots and other natural elements, enhancing the innate beauty nature provides. Each piece is a testament to sustainable artistry.

Rooted in tradition, crafted for tomorrow,
let us tell you:

THE WOOD STORY!

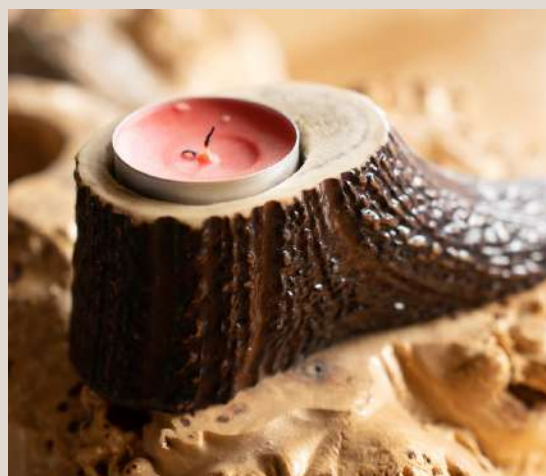

The Philosophy of Handcrafted Design

Our design philosophy places us firmly at the intersection of Fine Art, Interior Design, and Functional Furniture. We are committed to creating truly unique, one-of-a-kind pieces—tables, chairs, and decorative objects—that begin with the raw beauty of the tree root. The design process is inherently organic: we allow the natural shape of the wood to guide our hands. This is a deliberate dedication to quality; every item is entirely handcrafted and requires a significant commitment of time, often taking several months to bring a single piece to completion.

Our Portfolio

Our portfolio is anchored by two core pillars: a collection dedicated to showcasing **the natural richness and structure of the wood itself**, and our thematic line, the **Dacic Collection**, which translates significant Romanian historical events and heritage into powerful, evocative statement pieces.

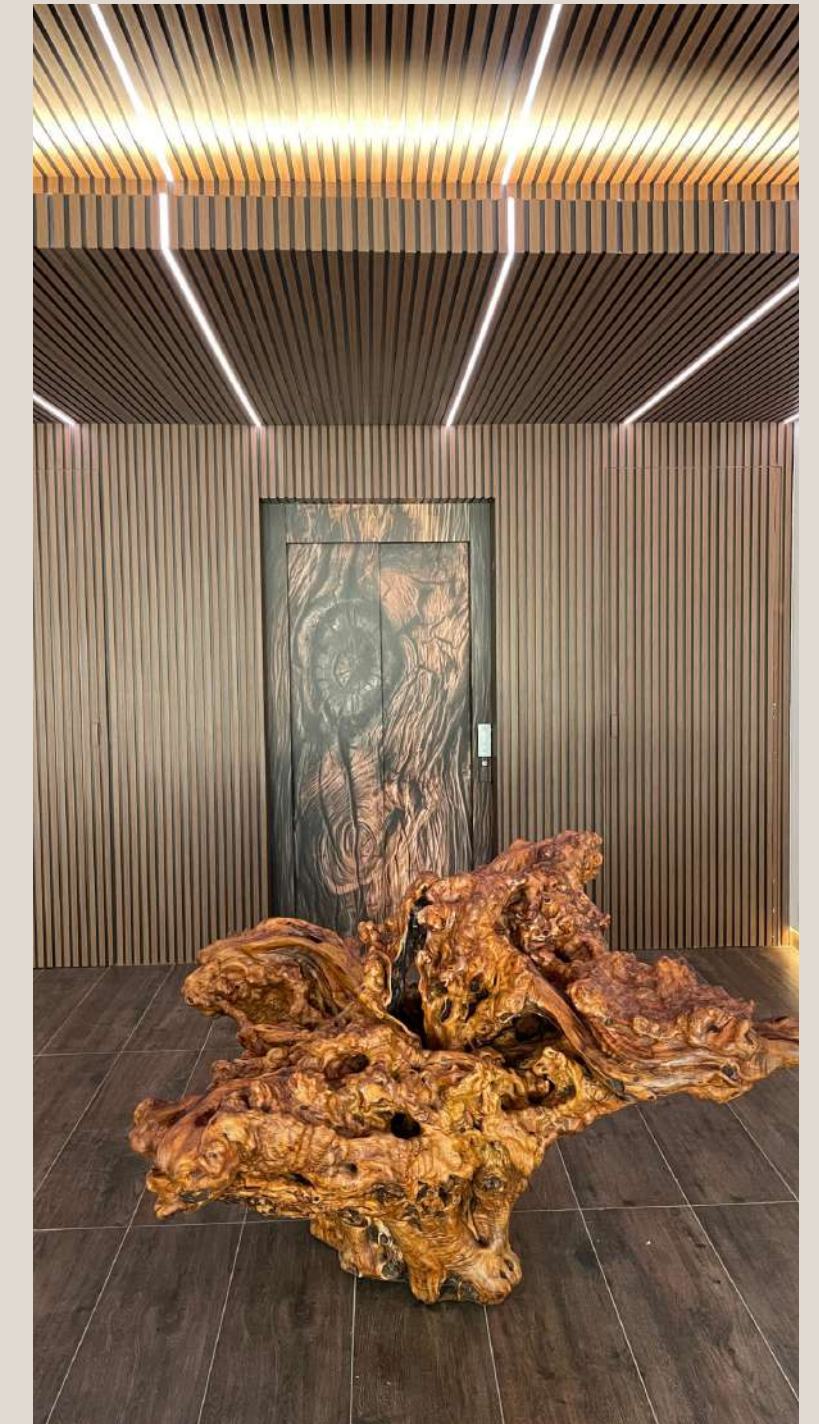

The Origins-collection overview

The commanding presence and singular artistry of The Origins pieces are designed to anchor and elevate exclusive commercial and hospitality environments. These sculptures are perfectly suited for five-star hotel lobbies and luxury restaurants that aim to feature a sophisticated, natural touch and convey enduring quality.

The inspiration for The Origins collection lies in a profound reverence for raw nature and the unique sculptural forms already created by the Earth. Our philosophy is that true luxury resides in rarity and history.

Dacic-collection overview

The Dacic Collection is a tribute to the enduring spirit, profound craftsmanship, and ancient heritage of Romania, drawing its inspiration directly from the rich history of the Dacian civilization. This collection goes beyond mere furniture; it is an exploration of national identity and tradition.

With its authentic feel and profound historical resonance, the Dacic Collection is uniquely suited for environments dedicated to the preservation and presentation of culture. These pieces are ideal for museums, historical landmark receptions and cultural centers.

Vivid details

Future Vision

Our future is a the commitment to expanding the reach of Romanian artistry and the profound beauty of our materials. We envision our brand achieving global recognition as the benchmark for luxury artisanal furniture, celebrated not only for its perfect craftsmanship and artistic view, but for its unique capacity to elevate living spaces.

Thank YOU!
